

Things I haven't written about:

Chaz

MUSIC: *yaaawn*

1. Return of Angry Kitteh.
2. Whether peanut butter cookies really do require fork prints.
3. How I got the doughnut today.
4. Things Duke knows that make me wonder how he passed the background check.
5. The remarkable effectiveness of anti-inflammatories when combined with alcohol.

And I'm still not going to write about them. Tonight, anyway. See #5. Sleepy. Fall over now.

Just wanted to make sure nobody thought I'd run off to join the circus.

(Coyotes snore. They do.)

Three things!

1) Okay, 0., She Wants Revenge = yes. It's like the Eighties rose up from the grave and came looking

Experimental Whole Wheat

Green Chile Robot Bread #1

Yes, baking with your hands is more fun. And the results have a better texture, and taste better.

They really do require fork prints. They don't taste as good without. (Someone's made a device specifically to make the crosshatching on the top of peanut butter cookies. I say that's cheating, and should be outlawed.)

Sleep well, Chaz. And don't snore too loudly.

(What would you do at the circus? That's not disbelief, I'm just wondering what your thoughts are on the subject.)

What *wouldn't* I do at the circus?

From the sound of your co-workers, I thought you already had run off and joined the circus...

You think you can say that with impunity because you're not a U.S. resident.

(We'll still open a file on you. We just can't do as much with it.)

1. *Return of Angry Kitteh.*

I was wondering about that the other day...

2. *Whether peanut butter cookies really do require fork prints.*

Yes, of course they do. I may try try making them as a sort of bar cookie, the way I do the shortbread, but there will still be fork prints.

3. *How I got the doughnut today.*

4. *Things Duke knows that make me wonder how he passed the background check.*

I'm not qualified to speculate on these. :)

5. *The remarkable effectiveness of anti-inflammatories when combined with alcohol.*

Oh, *yes* - just don't overdo the alcohol, and do not not not take tylenol when alcohol is impending. I've read enough about the possible liver damage to be really careful with this.

Completely off-topic: I'm getting a descendant of Elmer from [inaurolillium](#) next week! (Is "descendant" correct? It seems to be a clone of a clone, actually.) I'm so looking forward to playing with sourdough again.

Never fear! I don't take acetaminophen, in general.

I believe the correct terminology for a baby shoggoth is "spawn." Or possible "scion," in more formal circumstances.

[COLLAPSE](#)

Speaking of spawns, if one were of a sort to want to acquire a shoggoth of one's own, where would you suggest that one begin to look?

[I got mine here.](#)

You can also get San Francisco style ones from the internet.

It's possible that things Duke knows may be *why* he passed the background check.

As for the doughnut--base trickery, that's how.

So nevermind you. Angry Kitteh! Her fans want to know!

Has she come for the food?

Something came for food in the middle of the night. It did not, however, leave a calling card.

Could have been a raccoon.

Somebody else already beat me to my comments! The one about, judging from your posts and coworkers, you already being in the circus, and the link for the shoggoth (I got mine there as well. Yesterday a friend told me she had been fantasizing about my bread!). Hope you had a good night's sleep and feel better.

And yay for Angry Kitteh!

- 1) Kitteh! Mow!
- 2) NOT forked PB cookies? SACRELIGE!!!!
- 3) You outwitted the Crafty that is O? Spill!
- 4) All the OTHER things he knows, duh.
- 5) That's happy-happy, init?

Just wanted to make sure nobody thought I'd run off to join the circus.

We saw Cirque last weekend up in Portland and I swear to you that while watching more than a couple of the acts I thought 'Coyotes would so fall in love with *that* one... oh, and *that* one, and the other one there in the blue and yes, her too.'

If you like competent, confident, well-muscled women doing jaw-dropping feats Cirque is what we'd call a target-rich environment. Because, damn.

"2. Whether peanut butter cookies really do require fork prints."

No. Sometimes they can be smushed with a spoon and a reese's peanut butter cup inserted into the depression. But it's one or the other.
